Intelligence is the ability to respond adaptively to new situations, to think abstractly and to comprehend complex ideas. IQ is the abbreviation for Intelligence Quotient. The word quotient means the number of times that one number will divide into another. An intelligence test (IQ Test) is a standardized test designed to measure human intelligence as distinct from attainments.

The measured IQ of children is equal to mental age divided by actual (chronological) age. For example, if a child of eight years of age obtains a score expected of a ten-year-old, the child will have a measured IQ of 125, by means of the following calculation:

\[
\frac{\text{Mental age}}{\text{Chronological age}} \times 100 = \text{IQ}
\]

or

\[
\frac{10}{8} \times 100 = 125 \text{ IQ}
\]

This method of calculating IQ does not apply to adults because beyond the age of 18 there is little or no improvement in mental development. Adults, therefore, have to be judged on an IQ test in which the average score is 100. The results are graded above and below this norm according to known test scores.
The tests that have been compiled for this book have not been standardized, so an actual IQ assessment cannot be given. However, at the end of this Introduction there is a guide to assessing your performance in each test and also a cumulative guide for your overall performance on all ten tests.

The tests are intended as valuable practice for readers who may have to take an IQ test in the future, and they will also help to increase your vocabulary and to develop your powers of calculation and logical reasoning. The questions are challenging, and deliberately so, as this is the only way to boost your performance and increase your brainpower.

The book consists of ten separate tests for you to attempt, each of 40 questions. Each test is of approximately the same degree of difficulty. A time limit of 90 minutes is allowed for each test. The correct answers are given at the end of the book, and you should award yourself one point for each correct answer.

Use the following tables to assess your performance:

4  Eradicate, eliminate

5  Eternity ring

6  C; it contains the black dot and one smaller white circle inside the large circle, and one smaller white circle and black circle partly inside the large circle.

7  Charmingly

8  B; the smallest number is discarded at each stage and the remaining numbers travel in the opposite direction to the previous stage.

9  E; so one dot is in one circle and the other dot is in the circle and ellipse.

10  2; 7 + 8 +8 = 23

11  Eventful, ordinary

12  117; alternately subtract, then add the sum of the digits of the previous number.

13  A; the triangles become one large triangle and the truncated ellipse becomes two, rotating 180° and going inside the triangle.

14  Sleigh ride

15  Loom
16 Chivalrous

17 C; at each stage one of the sections goes through 45° and continues to move 45° at subsequent stages.

18 6; add 0.5, 1, 1.5, 2

19 DEPNU = UPEND
